[P. 18(A)] SA19 Talamanca SA19 Bribri Cabecar

354 **Furnishings.** In Talamanca, Chirripó, and Cabagra the hearth is made by placing tree trunks on the dirt floor with their ends together. The fire is kept going continuously and is not extinguished but covered with ashes when the family leave. During the night, someone shoves a trunk nearer to the center as it burns. In the large houses of the Bribri, there is a hearth for each wife (figs. 4, *c*; 6, *d*). This [252] is where she cooks for herself and her children as well as her husband. No house was seen with more than two hearths among the Cabécares (fig. 4, *d*). Over these fires wooden rods are suspended from the roof beams by pieces of *burio* (*Tiliaceae* sp., *see* Fibers). From these 251 rods hangs whatever needs drying, such as meat, seeds (usually in white *bijagua* leaves but occasionally in corn shucks), salt in black [824] *bijagua* (*Calathea* spp.) leaves, cacao pods for planting, plantains or bananas for ripening, 231 etc. A piece of hide from cattle or wild game is also hung from one of the rods and is used as food for the ever-present dogs when fresh 415 meat is lacking. Small *bavas*[1], made by men and 824 women from the vine called *kugaca* in Cabécar and *bejuco de hombre* in Spanish, or carrying nets made by women from *guarumo* (*Cecropia* spp.) fiber, are also suspended from the rods. They contain packages of salt wrapped in *bijagua* leaves and cacao pods. Hanging 352 shelves, called in Spanish *tabancos*, are rarely 177 seen in the large house. The fact that in Talamanca there is no word to designate these [192] shelves, other than the Bribri *koŋ*, meaning "place," suggests that here is a borrowed item, probably from the mestizos.

● 353 In this type of dwelling, the roof beams are important. Almost all things necessary for the family are stuck at random between the rungs of the roof construction or are hung from them (fig. 8, *a–c*). These necessities include food such as grains and fruits; carrying nets containing dried meat and tied tight with the stem of a plantain leaf; sieves made from gourds; forked sticks for lifting cooking ves- [272] sels; sticks with a number of little branches left for stirring chocolate; wooden spoons for stirring; chicken and wild turkey bones; hunting trophies; yeast for chicha wrapped in *bijagua* leaves; net bags with clay for making blow

[192] [1] "It is interesting to note that *kaLwa* is the word used in the upper Coen. It has a marked resemblance

1/4 [of a carrying baskets– ANALYST]

353 gun pellets; the necessary equipment for fishing and hunting; hen nets or nests for laying
[29] made of vine; bark containers or *havas;* reme-
[415] dies in gourds, net bags, wrapped in *bijagua* leaves, or, rarely, in bottles; tobacco leaves; bright feathers from birds, in particular the
[237] oriole and macaw; toucan bills; dried flowers; sea shells and the shells of crustaceans; animal skins for dress or for curing purposes; fibers for making rope or string; and seeds and tubers for planting.

352 513 *Cabuya* string (*see* Fibers) hammocks, made by the Bribri men and used by them and the Cabécares, are also suspended from the roofs of all houses and are for sleeping as well as resting. Instead of hammocks, sometimes leaves are placed on the ground by the fire and are used for sleeping. This is inconvenient as dogs and pigs are apt to disturb people sleeping on the floor.

352 Low tetrapod wooden stools or benches are common. These may be long, rectangular, or
[531] circular and are often decorated with a protruding head and tail. The women sit on them while cooking, or people while talking, in order not to be bothered by smoke. The
[824] benches are generally made of cedar by the men and are called *kaLwa* or *bekkegLɔ* in Cabécar and *kuLá* [77] in Bribri.

415 Close to the roof or the low wall, wooden mixing trays or wooden mortars, *havas,* and basketlike containers (*deku* in Cabécar), fre-
[824] quently lined with *bijagua* leaves to hold chicha paste, are raised on wooden supports to protect them from animals. Large earthen chicha jars with a pointed base are found in all the big circular houses of the Bribri and in some Cabécar ones (fig. 4, *c*). There is always
[439] one or more iron pots, bought in Limón or a Company commissary (fig. 6, *d*). This is true even in upper Talamanca. Here and in the
[824] remote parts of Chirripó, *bijagua* leaves fre-
[264] quently serve as plates and cups, and instead of spoons, knives and forks, the fingers are
[753] used for eating from these or from a common pot or gourd. People say that eating utensils are "dirty" and fear sickness as a result of their use.

352 177 In the smaller houses, the general furnishings are the same. As these dwellings are usually

[192] to the Bribri term *kuLá.* In this section, the two groups are in close contact.

Ujarrás, and China Kichá, the hearth is more often constructed of clay on a wooden table. Here wooden beds and mezzanines made of wooden rods are used for sleeping along with hammocks. Plates, spoons, cups, etc., are seen in every household although their number is limited according to the family purse. The low stool is always present but a chair and a table are found now and then. Hanging shelves serve for storing food and all manner of odds and ends. Yeast for chicha, generally wrapped in *bijagua* leaves, is hung on the wall posts. The fondness for decorating the wall with feathers, eggshells, bones, and skins, however, remains the same as on the Caribbean side. Attached to the exterior of the house are hen's nests made of vine baskets or *bavas*, a wild plant or orchid, and generally a piece of tree trunk containing wild bees.

DRESS AND ADORNMENT

An early report concerning the expedition of Fray Margil to the Province of Talamanca states:

> Their dress is very poor, because the men (are dressed) with their cloth of skins, and the women with their short cloths, and those who do not have them, with plantain leaves appear as contented as the best dressed Spaniards.[80]

Today, bark cloth (*see* Manufactures and Trade), still called *mastate* in Spanish, is used in upper Talamanca and upper Chirripó as shirts or Mother Hubbards, as loin cloths, and as bed covering. In the rest of the area inhabited by the Talamancas, it is only used as blankets. Sewing is done by both men and women but chiefly by the men.

The ordinary woman's garment consists of

y vara y medio de largo, con que cubren las partes de honestidad; las mujeres andan con una manta de lo mismo y algunas de algodón que la atan desde la cintura a las rodillas. . . ."

[80] De Espinosa, 1742, p. 64. "Su vestir es pobrisimo, porq los hombres con sus cendales de pieles, y las mujeres con sus pañalitos cortos, y las que no los tienen, con hojas de platanos se hallan tan contentos como los mas bien vestidos Españoles."
